

## Technical assistance to Vietdredge Joint Venture in their dredging operations

DEMAS provided the Executive Director for a joint venture with three leading Vietnamese Government owned dredging companies on behalf of a Dutch consortium, "Port & Delta Consortium bv" which consists of the Dutch Ministry of Inland Water Transport, four Dutch dredging companies, the NEDECO consultancy group and IHC, a shipbuilder. The Dutch consortium in joint-venture with the leading Vietnamese dredging companies is known as Vietdredge Joint Venture.

The Executive Director, who is based in Hanoi, provides on-the-job assistance, operational and technical advice to his Vietnamese counterparts on the operations, the maintenance and upgrading of their dredging fleets. The Government of Vietnam wishes to meet the growing demand for deeper entrances to the Countrys ports and large safe areas of reclaimed land for new developing industries by co-operating with foreign companies.

The DEMAS consultant, amongst other duties, acts as liaison between his Vietnamese counterparts and sources of technology available in the consortium.
